

Working together

From «working together» to ScaleAQ

Dear customer!

As of August 1st, Aqualine, AquaOptima and Steinsvik becomes ScaleAQ.

The companies within ScaleAQ have already worked closely together for the last two years and complement each other very well. Together we have 40 years of experience within aquaculture and have built up a very strong maritime knowledge. ScaleAQ provides a unique competence and high-quality product portfolio with local presence in 11 markets worldwide. We will deliver both individual products as well as complete turnkey projects, including consulting and project management.

Through ScaleAQ Innovation, we will strengthen our focus on product development and innovation within our four key business segments - Seabased, Landbased, Digital and Service. We will further develop to position the legacy companies Aqualine, AquaOptima and Steinsvik have built up to become specialists within these four segments.

Aqualine, AquaOptima and Steinsvik will remain as legal entities for the time being. We will use the time needed to ensure a good integration process to secure the needs of our customers in the best possible manner through this process. The Marketing and Sales team will, as of August 1st still consist of the same team you have worked with up until now, the only difference is that we all work within one ScaleAQ. Points of contact remain as before.

We will include more information about ScaleAQ on our new web site that will be launched today. Please also feel free to call your contact if you want to hear more about this process and the new ScaleAQ.

ScaleAQ will at AquaNor be present at stand A157 as well as at Skansen. We are very much looking forward to meeting you and present the new ScaleAQ.

Trondheim, 31 July.

Stig Domaas Førre

CCO ScaleAQ
