

OUR VISION

Setting the standard for responsible aquaculture.

WHAT IS AQUACULTURE?

Aquaculture is the farming of aquatic plants and animals. Aquaculture's primary function is to produce highly nutritious and environmentally sustainable seafood to meet the consumer demands for high quality protein. In Newfoundland and Labrador, farmers grow Atlantic salmon, blue mussels, steelhead trout and oysters.

WHO WE ARE

The Newfoundland and Labrador Aquaculture Industry Association (NAIA) is a member-based organization that represents the interests of seafood farmers and their suppliers in Newfoundland and Labrador. We are passionate advocates on behalf of our members to facilitate and promote the responsible development of the aquaculture industry.
