

Grade 4 Art

Specific Curriculum Outcomes

1.4.5 demonstrate and apply knowledge of basic art skills, techniques., processes, and language

- Paper manipulation

2.4.3 Create art for a variety of audiences and purposes

- Make a poster

Suggested Teaching and Learning Strategies:

Use the origami activities to make sea creature origami for paper manipulation, try and make some organisms that resemble aquaculture species. Use the general aquaculture presentation to get an introduction to aquaculture and the organisms.

Make posters displaying aquaculture in NL and post them around the school or community. Use general knowledge from the general aquaculture presentation and include the species cultured in the province and some of the benefits of the industry. Use the colouring books to also make posters displaying the different aquaculture species and related organisms like plankton.
